

## Activity Time!

# Pipe-Cleaner REPTILES

Reptiles include snakes, lizards, alligators, crocodiles, turtles, and tortoises. They live everywhere on Earth except in the coldest environments.

### WHAT YOU NEED

pipe cleaners of different colors, beads, googly eyes, glue

### WHAT YOU DO

**Use the pipe cleaners to make your own reptile.**

What type of reptile will it be? What type of environment does it live in? What adaptations does it have? Bend, twist, shape, and cut the pipe cleaners to make your reptile. Add eyes. You may also want to add beads for color.

**Think about the other reptiles that might live nearby.**

Give your reptile some friends! Find some other materials to create a habitat for your reptiles.

**Write a story about your reptile.**

Include a description of how it survives in its environment. Don't forget to include its adaptations!
