

Build It Yourself . . . Wind Can Do Work

from *Renewable Energy: Discover the Fuel of the Future with 20 Projects*

Pin Wheel

paper • scissors • hole puncher

1. Cut out along the square.
2. Cut the lines running from the corners towards the center.
3. Punch the holes in the corners and center.
4. Pull the corners with the holes to the back and line up with the center hole. These are your windmill blades that your small straw will slide through.
