ACTIVITY!

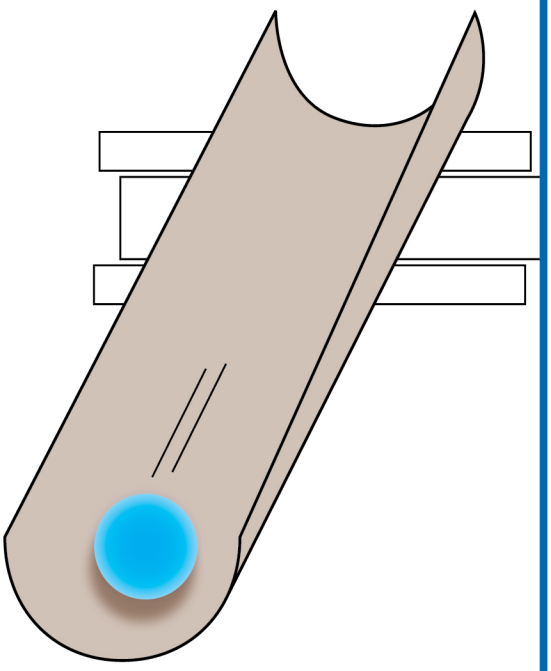
Project from **Picture Book Science - Simple Machines!** Six books that explore inclined planes, levers, pulleys, screws wedges, and wheels.

Activity Time!

Make a Marble Run!

What You Need

cardboard tubes - tape - books or blocks - marbles



What You Do

- Ask an adult to cut the cardboard tubes the long way so you can see inside. These are your inclined planes!
- Tape the pieces of tubes together to make longer and shorter runs.
- Stack books or blocks and balance your runs across these, making a pattern for the marbles to roll down.

Try It Out! Put a marble at a high end and watch it make its way down. Do you need to move your runs for the marble to roll all the way to the end?
